## C\_34

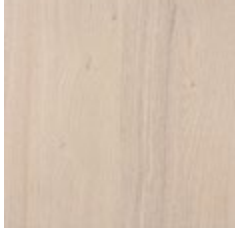

Il progetto C\_34 nasce dall'incontro tra tecnica e maestria artigianale. Il taglio a 34° definisce superficie e linee organiche che guidano il design di ante, frontali, piani e terminali, creando un dialogo armonico tra forma e funzione. I fianchi curvi e il top si intersecano con l'anta in un effetto di continuità visiva. C\_34 diventa espressione di una lunga tradizione artigianale reinterpretata con sensibilità contemporanea.

## Struttura di base

La struttura della cucina passa dalla profondità standard di 60 cm a ben 65 cm. Tale soluzione aumenta la capienza complessiva della base e la profondità del piano, quindi la superficie lavoro. Questa soluzione unita allo zoccolo da 6 cm e la struttura H 84 cm ridefinisce i volumi in cucina.

- ★ **Antigraffio**  
Anti-scratch / Inrayable
